

Traumeel Injection for Acute Injury

Traumeel is an outstanding combination homeopathic remedy that can be used for a multitude of injuries. It has been clinically proven and used for more than 40 years in over 50 different countries. All of its ingredients act together on any inflammatory response/inflammation that occurs at and around the site of injury.

This revolutionary product is now coming to the forefront of modern day sports medicine in the treatment of muscle and ligament injuries. Traumeel can be used for vast range of injuries.

Here is a simple list of some of the many complaints it can help:

- Swelling and bruising of soft tissue and muscles
- Muscle sprains and strains
- Cuts and local injuries
- After any trauma or shock
- Inflamed and swollen joints
- Dislocations
- Ligament injuries
- Inflammatory degenerative processes (i.e. arthritis, bursitis, tendonitis)

You can see from this that just about every everyday injury, ache and pain is covered in the above list!

The injection advantage?

The advantage of using Traumeel injection is the speed of delivery, as it does not have to travel first through the digestive track before reaching the site of injury, thus the response is immediate and the effect is dramatic. In acute problems, we see patients daily. In chronic conditions, we see patients 1 to 3 times a week.

What will the procedure involve?

The skin over your injury is cleaned. Then a mixture of local anesthetic and Traumeel is injected into the injured area with a fine needle.

How well does it work?

It can speed up the healing time by at least 50%.
